- HTML and CSS
- Figma
- Javascript
- React
- TailwindCss
- SQL
- MongoDB
- Github
- Nextjs
- Nodejs
- Postman
- Networking and Cyber-security
- Microsoft Server
- Microsoft Excel
- Microsoft word

PROFESSIONAL EXPERIENCE

NIIT

SOFTWARE PROGRAMMING INSTRUCTOR, June 2024 – Now

- Designing and implementing detailed lesson plans for diverse programming courses.
- Teaching programming languages and software development best practices.
- Accessing and evaluating student performance through assignments, tests and projects.
- Offering personalised feedback and guidance to support student growth.

THESKILLGARAGE

FRONTEND DEVELOPER, Remote, May 2024 – Now

- Built and implemented custom designs using React.js while leveraging Bubble.io for efficient no-code development.
- Crafting dynamic user interfaces and rapid prototyping.
- Managed application wide state and API consumption.

SERVUS TECHNOLOGIES LTD

FULL-STACK ENGINEER, November 2023 – May 2024.

- Spearheaded end-to-end web application development, ensuring top-tier user experiences by leveraging the MERN stack.

- Collaborated with multidisciplinary teams, translating business requirements into agile, innovative software solutions.
- Conducted rigorous testing, automated continuous integration, and fortified applications with robust security measures
- Created and managed user authentication, authorization and security with password encryption as well as implementation of refresh jsonwebtokens for seamless authentication.
- Built and implemented custom designs components with HTML, and CSS consistent with company standards.
- Pioneered projects, refined coding standards, and fostered team growth in a dynamic, innovative environment.

KTECH SOLUTION

FRONTEND ENGINEER, November 2022 – Now

- Implemented Search Engine Optimization by converting client side React application into a server side rendered application with React Helmet which improved page rank and reach on Google search by 50%.
- Managed application wide state and API consumption.
- Collaborated with UI/UX designers in the implementation of user dashboard and forward facing user components which improved User engagement by 20%.
- Collaborated with backend engineers and utilized Postman analysis and consumption of backend API and third API integration.
- Collaboration with backend engineers in development, implementation and consumption of API request endpoints and transformation of the received data from the endpoints into standards consistent with the user interface of the application.

LAGOS STATE UNIVERSITY OF SCIENCE AND TECHNOLOGY

NETWORK TECHNICIAN, June 2021 – 2022

- Installation and maintenance of networking routers and switches.
- Assigning and configuration of IP address.
- Installation and maintenance of surveillance cameras.

EDUCATION

BELLS UNIVERSITY OF TECHNOLOGY

Bachelor of science in Computer Engineering (4.1/5.0)
2023
