OBJECTIVE

Emmanuel is an individual open to upgrading his abilities to provide values. His humility and effective communication skill has aided him in working effectively with teams in the development and implementation of customer friendly and optimal applications. Looking to leverage his knowledge and experience into a role as a Frontend web developer and to implement technological solutions.

PROFESSIONAL EXPERIENCE

KTECH SOLUTION
FRONTEND ENGINEER, November 2022 – Now

- Implemented Search Engine Optimization by converting client side React application into a server side rendered application with React Helmet which improved page rank and reach on Google search by 50%.
- Managed application wide state and API consumption.
- Collaborated with UI/UX designers in the implementation of user dashboard and forward facing user components which improved User engagement by 20%.
- Collaborated with backend engineers and utilized Postman analysis and consumption of backend API and third API integration.
- Created and managed user authentication, authorization and security with password encryption as well as implementation of refresh jsonwebtokens for seamless authentication.
- Collaboration with backend engineers in development, implementation and consumption of API request endpoints and transformation of the received data from the endpoints into standards consistent with the user interface of the application.
- Built and implemented custom designs components with HTML, and CSS consistent with company standards.

LAGOS STATE UNIVERSITY OF SCIENCE AND TECHNOLOGY
NETWORK TECHNICIAN, June 2021 – 2022

- Installation and maintenance of networking routers and switches.
- Assigning and configuration of IP address.
- Installation and maintenance of surveillance cameras.
