Apotiola Emmanuel

OBJECTIVE

Emmanuel is an individual open to upgrading his abilities to provide values. His humility and effective communication skill has aided him in working effectively with teams in the development and implementation of customer friendly and optimal applications. Looking to leverage his knowledge and experience into a role as a Software developer and to implement technological solutions.

TECHNICAL SKILLS

Frontend Development:
HTML & CSS, JavaScript, React, Redux, Next.js, Tailwind CSS, Chakra UI, React Form Hook, Figma

Backend & Databases:
Node.js, JWT, Bcrypt, SQL, PostgreSQL, MongoDB, Strapi (Headless CMS), Firebase, CI/CD pipeline

Tools & Platforms:
Git, GitHub, Postman, Jira, Trello, Slack, Microsoft Excel, Microsoft Word, Microsoft Server

Networking & Security:
Networking, Cybersecurity

EXPERIENCE

THESKILLGARAGE, Remote — *Frontend Engineer*

2024 - PRESENT

- Built and implemented pixel-perfect, responsive web applications using **React.js**, integrating both custom and pre-built components.
- Developed dynamic user interfaces using **Tailwind CSS** and **Chakra UI**, ensuring consistent styling, design system adherence, and responsive layouts.
- Crafted dynamic user interfaces with a focus on **UX optimization**, **accessibility**, and **cross-browser compatibility**.
- Managed **application-wide state** using Context API and Redux, ensuring consistent user experience across components.
- Integrated **RESTful APIs** and handled asynchronous data fetching, error states, and loading indicators with robust patterns.

- Collaborated with designers and backend developers to translate UI/UX wireframes into functional, interactive applications.
- Implemented component libraries and reusable patterns to speed up development and maintain code scalability.
- Participated in **code reviews**, provided constructive feedback, and followed best practices in Git version control and CI/CD workflows.

SERVUS TECHNOLOGIES LTD, Lagos, Nigeria — *Full-Stack Engineer*

NOVEMBER 2023 - MAY 2024

- Spearheaded full-cycle development of scalable web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js), ensuring high performance and exceptional user experience.
- Built robust frontend interfaces with React.js, utilizing Tailwind CSS and Chakra UI for responsive, accessible, and maintainable design systems.
- Developed RESTful APIs and backend logic with Node.js and Express, focusing on modular architecture and scalability.
- Created secure user authentication and authorization systems using bcrypt for password encryption and implemented JWT refresh tokens for seamless and persistent sessions.
- Integrated third-party services and APIs to extend functionality while maintaining system integrity and security.
- Led implementation of CI/CD pipelines and automated testing strategies (unit/integration), enhancing code reliability and deployment efficiency.
- Collaborated cross-functionally with UI/UX designers, QA, and product managers in an Agile environment, translating business requirements into technical solutions.

KTECH SOLUTION, Lagos, Nigeria — *Frontend Engineer*

NOVEMBER 2022 - PRESENT

- Enhanced **SEO performance** by converting a client-side React application into a **server-side rendered** solution using **React Helmet**, resulting in a **50% improvement in page rank and organic reach** on Google Search.
- Developed and maintained scalable front-end features using **React.js**, with a strong focus on performance optimization, responsiveness, and accessibility.
- Managed **application-wide state** using tools such as **Context API** and **Redux**, and handled efficient **API consumption** and asynchronous data workflows.
- Collaborated closely with **UI/UX designers** to implement a dynamic user dashboard and public-facing components, leading to a **20% increase in user engagement**.

- Worked with **backend engineers** to design, test, and consume RESTful APIs; utilized **Postman** for endpoint analysis and integration testing.
- Transformed complex API response data into clean, user-friendly interfaces that aligned with design specifications and UI standards.
- Participated in agile development cycles, contributed to **sprint planning**, and maintained clean code practices with **code reviews** and documentation.

NIIT, Lagos, Nigeria — *Software Programming Instructor*

JUNE 2024 - PRESENT

- Designed and delivered structured lesson plans for courses in **JavaScript**, **Java**, **HTML/CSS**, and **software development fundamentals**.
- Taught key concepts such as **data structures**, **object-oriented programming**, and **version control** using hands-on, project-based learning.
- Assessed student performance through **assignments**, **quizzes**, and **capstone projects**, offering targeted feedback for improvement.
- Conducted both **in-person and virtual sessions**, adapting teaching methods to accommodate various learning styles and skill levels.
- Introduced students to **industry practices** like **debugging**, **agile workflows**, and **Git/GitHub collaboration**.

EDUCATION

BELLS UNIVERSITY OF TECHNOLOGY, Ogun, Nigeria

Bachelor of Engineering in Computer Engineering

TRAINING & CERTIFICATIONS

- Introduction to Cybersecurity | Cisco Networking Academy 2022
- The Complete Full-Stack Javascript Course | Udemy 2023
- The Complete React Native + Hook Course | Udemy 2024
